

Sophie Mainz

Full-Stack Web Developer

An aspiring junior full-stack web developer, specializing in JavaScript, Node, and React, recently completed a boot camp at CareerFoundry. Profound affinity for languages and an inherent curiosity drive a desire to harness rapid learning aptitude and organizational finesse for impactful app development. The goal is to secure an inaugural role as a React developer, contributing to transformative applications in the health or education sector.

Work Experience

2022

uni-assist | Berlin

Case worker

Evaluating international student applications from India and Bangladesh.

Diligently reviewed academic records, calculated admission grades, ensured document conversions, and verified language proficiency and application completeness.

Improved application accuracy, streamlined admissions processes, and provided clear communication to both applicants and universities.

Projects

2023

CareerFoundry | Berlin

Training [?]

Intensive project-based online training program with a primary focus on mastering JavaScript, React, and Node.js. This comprehensive curriculum covered a wide array of topics essential for full-stack web development, providing in-depth knowledge and hands-on experience in creating dynamic and interactive web applications.

2023

CareerFoundry | Berlin

Project XY

Designed and developed a 90s Movie Web Application, by meticulously planning, developing, and refining the project through stages of API design, frontend and backend development, and user-centric design using Node.js, Express.js, MongoDB, React, Redux, JSON Web Tokens (JWT), and Passport.js. View project here: [90s Movie App](#).
